Aesthetic Plastic Surgery

AS ONE OF AMERICA'S TOP DOCTORS

in plastic surgery, Dr. David Mobley has spent almost 20 years in his specialty and is highly valued for his patient care and attention. Beyond his consistent recognition as a "Top Doctor," Dr. Mobley recently received the "Patient's Choice Award" for the third year in a row as well as the "Most Compassionate Doctor" on the popular Vitals health website.

The recognition stems from his focus on relating to patients through one-on-one discussions where he listens to the patient's issues and explains recommendations. "Every patient deserves to know exactly what to expect. The most important asset I offer is my time to ensure they feel comfortable and achieve the result they expect from their surgery."

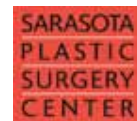

As part of that goal, Dr. Mobley has incorporated advanced online and tablet-based software designed to help his patients understand the process and literally "see" what their expected result would be in advance. Video tutorials and unrehearsed

video-testimonials are available for patients to view in the office or in the privacy of their home, enabling them to formulate questions for their personal discussion with him and

"Every patient
deserves to
know exactly
what to
expect."

gain confidence that he is the right doctor to perform their procedure. After the consultation, patients can review the discussion points and actually envision themselves post-surgery by means of three-dimensional images that morph the patient's own image with the expected results.

Dr. Mobley has earned recognition and gained a loyal following through referrals from past patients as well as many of Sarasota's health professionals who refer family and friends. Consultations with Dr. Mobley are available through Sarasota Plastic Surgery Center, a state-licensed and federally certified ambulatory surgery center.
